A CALL TO HUMANITY

U.N. International Climate Change Conference, Copenhagen, December 7, 2009

World leaders have predetermined that no agreement protecting our Mother Earth will be reached in Copenhagen, exposing them in contempt of their constituents and responsibilities of addressing the root cause of the global ecological disaster of climate change which is threatening all living things upon our Mother Earth.

The true cause of this global environmental threat is not man made technology, but rather, it is the process of "Man" relinquishing our responsible stewardship over our technologies, to allowing our technology to control us through the application of the global economic system of "Democrapitalism" (the process of capitalism consuming and depleting our Mother Earth's non-renewable resources, protected by Democracy).

As the world leaders focus on the contrived economic crisis, the focus of the world's population is diverted from our responsibility of mending our Mother Earth's health, to the concerted effort of the governments of this world increasing the economic attack on her non-renewable resources, depleting and destroying her life force. This is exemplified through first world countries such as "**Canada**" officially disregarding all environmental standards from applying to new development, in the name of bolstering the economy.

This irresponsible behaviour continues to plunge us deeper into an environmental nightmare, exposing the true nature of the world leaders and of their bureaucracies for the "**criminals**" that they are. As the people of this world continue to allow such criminals to violate our Mother Earth, preventing our future generations ability to even just survive, exposes the "**insane**" behaviour of killing our children through our economic practices.

With the behaviour of the people of this Earth combined with the behaviour of their world leaders together creates an atmosphere of destruction, which exemplifies that democracy and capitalism combined together dehumanizes human beings, enslaving all to function, in relation to our Mother Earth's environment, as "**criminally insane**".

The governments of this world must be stopped from representing the "**money markets**" over the well being of our Mother Earth. The people must correct the inadequate governments that have failed to facilitate human kind into a proper relationship with the environment in which we live.

Clearly, the experiment of democracy has failed to protect the people from the ravages of capitalism. Unfortunately, the people being bound by its bureaucracy are prevented from attaining any tangible solution, due to cost effectiveness. The only true solution is for the recognition of Native Rights of the People of Turtle Island and to re-establish a working relationship with the indigenous people through the TWO ROW WAMPUM Peace Treaty, which in turn will allow the application of the Great Law of Peace, which will re-establish the equilibrium between our Mother Earth and us as her **responsible Children**.

In Peace and Friendship
